Gateway Safety® Offers a Full Line of Earplugs – Effective Hearing Protection at an Affordable Price

December, 2008—As part of its mission to provide comfortable, high-quality safety products at economical prices, Gateway Safety, Inc. offers a full line of disposable and reusable earplugs with independently-tested Noise Reduction Ratings ranging from 25dB to 31dB. Each style comes in a bright color, making compliance checks easy. An optional breakaway cord is also available. All Gateway Safety earplugs come packaged in a convenient, ready-to-hang dispenser box, making distribution to workers a snap.

Disposable Earplugs

Designed as a one-time-use product, disposable earplugs are Gateway Safety's value-priced hearing protection solution. The comfortable, colorful earplugs encourage employee compliance and provide some of the highest ratings – 29 NRR and 31 NRR.

GloPlugz® feature a 31 NRR, one of the highest independently-tested ratings available. With a smooth, tapered design, a vibrant blue color, and a soft non-allergenic polyurethane formula, GloPlugz help ensure all-day comfort. Their soft, smooth “skin” makes insertion easy. Optional purple breakaway cord available.

SoftPlugz™ are designed with a standard barrel shape, in a slightly longer design for a deeper, more secure fit. Made of a non-allergenic and moisture-resistant bright orange polyurethane foam, SoftPlugz provide a 29 NRR for excellent sound protection. Optional yellow breakaway cord available.

Reusable Earplugs

Designed as a multi-use hearing protection solution, reusable earplugs are made of a washable material. A little water or alcohol is all that's needed to clean the earplug so it can be used over and over again.

Twisters™ are a washable, reusable solution earplug solution with a 25 NRR, making them the perfect choice for mid-range hearing protection applications. Twisters' effective triple-flange design forms a triple seal in any size ear. The plug post enables easy insertion into the ear without having to roll or touch the plug, helping to eliminate the chance of germs entering the ear. An air bubble tip helps make Twisters extremely soft and comfortable to wear, yet durable enough for long-term use. They are made of high-quality, high-visibility purple silicone and are available with an optional hi-viz orange cord.

Gateway Safety, Inc. designs and manufactures cost-effective, dependable eye, hearing, respiratory, and head and face protection products that workers want to wear. Since 1944, Gateway Safety, Inc. has made it its mission to help companies increase safety compliance and improve the overall welfare of their employees – which, in turn, helps companies reduce the high costs associated with eye and face injuries.
