NEW! Scorpion[®] SM Safety Eyewear – Fits Smaller Faces Better!
Ten Percent (10%) Smaller Than The Original, Popular Scorpion[®] Style

February 26, 2009—Some manufacturers are discovering that there's a need for safety eyewear that has been specifically designed for people with narrow faces, including women. Gateway Safety, however, has catered to this market for many years. Now, Gateway Safety adds to that growing line of smaller-size safety eyewear by introducing Scorpion[®] SM – safety eyewear that's 10 percent smaller, but otherwise identical to the popular Scorpion style.

Like the original, Scorpion SM comes loaded with features. It's attractive and lightweight, yet incredibly durable. Adjustable-length, four-position ratcheting temples provide a truly custom fit. A soft fingertip nosepiece helps minimize slipping, even in hot work environments, while a venting system between the frame and lens helps minimize fogging.

Scorpion SM meets or exceeds the ANSI Z87.1+ standard. Lens options include Clear, Gray, Clear Anti-Fog, Clear In/Out Mirror, and Silver Mirror – all of which filter out more than 99.9 percent of harmful UV-A and UV-B rays. Scorpion SM is the ideal solution for workers with smaller faces who want safety eyewear that's incredibly comfortable.

Gateway Safety, Inc. designs and manufactures award-winning, cost-effective personal protection equipment. Product categories include eye, face, head, hearing, and respiratory protection. For more than 60 years, it's been Gateway Safety's mission to help employers increase safety compliance and improve the overall welfare of their employees by making safety products that workers want to wear – which, in turn, helps companies reduce the high costs associated with workplace injuries.
