

New! Gateway Safety Adds 3.0 Diopter Magnification Lens to Popular Bifocal Safety Eyewear Lines

Five Diopter Strengths Now Available in Scorpion MAG and StarLite MAG eyewear

January 2011—Now, Gateway Safety offers an even stronger magnification lens option for workers needing bifocal vision correction AND eye protection on the job. To meet the needs of a growing aging workforce, Gateway Safety has added a clear 3.0 diopter lens option to its two bifocal eye protection styles—**Scorpion[®] MAG** and **StarLite[®] MAG**. Both are now available in five diopter strengths: 1.0, 1.5, 2.0, 2.5, and 3.0.

Bifocal safety eyewear allows workers needing extra magnification to clearly read instrumentation and documents, work with small parts, or perform other close-at-hand tasks—all without having to switch between regular safety glasses and reading glasses, a dangerous practice that can result in errors and eye injuries.

Scorpion[®] MAG bifocal safety eyewear comes loaded with features that provide a personalized fit and all-day comfort. Adjustable-length ratcheting temples and a soft “fingertip” nosepiece make Scorpion MAG fit comfortably without slipping. The dual lens design has a venting system that helps minimize fogging. Meets or exceeds the ANSI Z87.2+ standard.

StarLite[®] MAG is a bifocal version of the highly popular original StarLite safety glasses. In demand for its legendary styling, comfort features, and all-around impact protection, StarLite MAG is Gateway Safety’s most cost-effective bifocal eye protection. Meets or exceeds the ANSI Z87.2+ standard.

About Gateway Safety, Inc.

Gateway Safety, Inc. designs and manufactures award-winning, cost-effective personal protection equipment. Product categories include eye, face, head, hearing, and respiratory protection. For more than 65 years, it’s been Gateway Safety’s mission to help employers increase safety compliance and improve the overall welfare of their employees by making safety products that workers want to wear—which, in turn, helps companies reduce the high costs associated with workplace injuries.
